

Disignage.

Disignage offers a total solution for Digital Signage: concept creation, screens, hardware, software, content production, planning and analysis of your Digital Signage project.

Disignage

Disignage was founded in 2008 as a subsidiary of Compriori Consulting, a Dutch full-service communications agency.

Panamint planner

Because existing planning software did not fit our needs and requirements, we developed our own Digital Signage planning software: Panamint Planner. The system takes care of the planning and distribution of your visuals over the internet. It has the following, unique capabilities:

- Plan your visuals by day, time, location, group or screen
- Plan different visuals per location or group of locations
- Group your locations by any attribute you like: simply tag it
- Choose whether you play the visuals at random order, or in a playlist
- User Generated Content: choose whether you want to share your visuals with others or not

Philosophy

We believe in offering a total solution for Digital Signage. We can cut your costs, while ensuring the total quality. Also, the flexibility is second to none: individual adjustments to the software are easily made.

Clients

Typical clients are:

- Retail
- Hospitality
- Restaurants and bars
- Petrol stations
- Sports venues
